

## Sensory Scavenger Hunt

Using your senses to explore and learn more about the world around you is an important part of being a naturalist! See if you can see, hear, smell, and touch all of the things listed on the front of this page. You can use the extra space in each box to write or draw what you find:

| See   | Hear   | Touch   | Smell   |
|---|--|---|---|
| Something bigger than you   | A bird<br><i>How many different bird sounds do you hear?</i>                         | Something soft  | A flower<br><i>Can you find another flower with a different scent?</i>            |
| Something smaller than your thumb   | Wind in the leaves   | Something rough   | A pine tree<br><i>What happens when you rub the needles between your fingers?</i> |
| Your favorite color<br><i>How many shades of this color can you find?</i> | A car or airplane  | Uneven ground under your feet<br><i>Can you feel your way with closed eyes for a few steps?</i> | Soil or a rotting log   |
| Something hidden or camouflaged   | Footsteps<br><i>What do they tell you about how that person or animal is moving?</i> | Wind in your hair or on your face   | The air around you  |

When you've completed this scavenger hunt, turn the page over and list more discoveries on the back!

Try to list as much as you can in each of the categories below. Remember to use descriptive words - if you touched a leaf, what did it feel like?

**I saw:**

**I heard:**

**I touched:**

**I smelled:**
